Note

- Most manuscripts have not been transcribed and in consequence these apparatuses contain only a sample of the extant corpus.
- The collations and apparatuses have been created using automated algorithms and may in consequence display occasional imprecisions, especially in word alignment when there is significant textual variation in a verse. Please use them for indicative purposes only.
- Some manuscripts contain a verse more than once. This often involved splitting a verse and placing each segment on a different section of the manuscript. We have implemented an algorithm that reconstructs the complete verse from the separate segments. Reconstructed verses are shown between round brackets. For example, 40844(1^c2) is the verse as it was attested in 40844 in a reconstruction that merged instances 1 and 2. Given that these are automated reconstructions, manual double-checks are advised. Sometimes it is not possible to safely reconstruct a verse and the witnesses where this is the case are not included in the collation (to see the specific witnesses that could not be reconstructed, please consult the witness counts for each verse).
- Corrected witnesses (marked with a superscript letter c) are reconstructed automatically and may display inaccuracies. They are shown with a ? sign to reflect this uncertainty. A corrected witness is included in the apparatus if its text is present in at least another witness, ie, if it does not attest to a singular reading.
- A witness is ignored if 60% or more of the words that it contains of the specific verse are uncertain.

Website version 2.0.0, witness transcriptions up-to-date as of October 1, 2023. More information at www.gntcollations.com. Collations created by Norman Simon Rodriguez.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IX.

¹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

²The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (13) minus the fragmentary witnesses (0) plus the included corrected witnesses (0).

Below is the earliest attestation of each *individual Byzantine reading*:

Reading	Earliest attestation (century)

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 57 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (43) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

³These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁴The total number of witnesses is calculated as the total manuscripts (114) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (20) minus the fragmentary witnesses (0) plus the included corrected witnesses (0).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: V.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 54 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (40) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: V.

Below is the earliest attestation of each *individual Byzantine reading*:

⁵These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁶The total number of witnesses is calculated as the total manuscripts (114) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (18) minus the fragmentary witnesses (1) plus the included corrected witnesses (0).

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 66 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (29) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

⁷These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁸The total number of witnesses is calculated as the total manuscripts (114) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (16) minus the fragmentary witnesses (0) plus the included corrected witnesses (0).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine textform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 50 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (48) attest to singular texts for the entire verse and are

therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IX.

⁹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

¹⁰The total number of witnesses is calculated as the total manuscripts (115) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (14) minus the fragmentary witnesses (0) plus the included corrected witnesses (2).

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 67 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (36) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: V.

Below is the earliest attestation of each *individual Byzantine reading*:

¹¹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

¹²The total number of witnesses is calculated as the total manuscripts (115) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (4) minus the fragmentary witnesses (1) plus the included corrected witnesses (0).

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 91 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The

remaining witnesses (19) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

¹³These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

¹⁴The total number of witnesses is calculated as the total manuscripts (115) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (20) minus the fragmentary witnesses (1) plus the included corrected witnesses (3).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 47 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (50) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.

¹⁵These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

¹⁶The total number of witnesses is calculated as the total manuscripts (115) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (6) minus the fragmentary witnesses (1) plus the included corrected witnesses (1).

- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine textform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 86 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (23) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

¹⁹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

²⁰The total number of witnesses is calculated as the total manuscripts (114) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (13) minus the fragmentary witnesses (1) plus the included corrected witnesses (0).

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IV.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 72 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (28) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.

²¹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

²²The total number of witnesses is calculated as the total manuscripts (112) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (16) minus the fragmentary witnesses (0) plus the included corrected witnesses (1).

- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine textform for this verse in a transcribed manuscript: IV.

Below is the earliest attestation of each *individual Byzantine reading*:

Reading	Earliest attestation (century)
αλλα	IV
δια	IV
της	IV
χαριτος	IV
του	IV
κυριου	IV
ιησου	IV
πιστευομεν	IV
σωθηναι	IV
καθ	IV

τροπον	IV
καχεινοι	IV

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 79 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (18) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

²³These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

²⁴The total number of witnesses is calculated as the total manuscripts (112) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (14) minus the fragmentary witnesses (0) plus the included corrected witnesses (5).

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: V.

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 70 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (28) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: V.

Below is the earliest attestation of each *individual Byzantine reading*:

²⁵These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

²⁶The total number of witnesses is calculated as the total manuscripts (111) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (7) minus the fragmentary witnesses (o) plus the included corrected witnesses (o).

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 90 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The

remaining witnesses (14) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.

²⁷These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

²⁸The total number of witnesses is calculated as the total manuscripts (111) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (8) minus the fragmentary witnesses (0) plus the included corrected witnesses (1).

- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine textform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IV.

Below is the earliest attestation of each *individual Byzantine reading*:

²⁹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

³⁰The total number of witnesses is calculated as the total manuscripts (111) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (8) minus the fragmentary witnesses (o) plus the included corrected witnesses (o).

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 94 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (9) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

³¹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

³²The total number of witnesses is calculated as the total manuscripts (111) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (12) minus the fragmentary witnesses (0) plus the included corrected witnesses (1).

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 76 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (24) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

³³These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

³⁴The total number of witnesses is calculated as the total manuscripts (111) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (12) minus the fragmentary witnesses (0) plus the included corrected witnesses (2).

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IX.

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 73 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The

remaining witnesses (28) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.

³⁵These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

³⁶The total number of witnesses is calculated as the total manuscripts (111) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (3) minus the fragmentary witnesses (0) plus the included corrected witnesses (1).

- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine textform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

Reading	Earliest attestation (century)
γνωστα	IV
απ	IV
αιωνος	IV
εστιν	V
τω	V
θεω	IX
παντα	IX
τα	IX
εργα	IX
αυτου	V

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 93 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition

may change as new manuscripts are added to the collation in future. The remaining witnesses (16) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.

³⁷These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

³⁸The total number of witnesses is calculated as the total manuscripts (112) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (6) minus the fragmentary witnesses (o) plus the included corrected witnesses (o).

- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine textform for this verse in a transcribed manuscript: IV.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 95 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (11) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

⁴¹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁴²The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (17) minus the fragmentary witnesses (2) plus the included corrected witnesses (0).

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 70 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (24) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

⁴³These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁴⁴The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (24) minus the fragmentary witnesses (1) plus the included corrected witnesses (1).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine textform for this verse in a transcribed manuscript: IX.

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 49 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (40) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IX.

⁴⁵These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁴⁶The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (12) minus the fragmentary witnesses (2) plus the included corrected witnesses (3).

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 75 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (27) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: X.

⁴⁷These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁴⁸The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (18) minus the fragmentary witnesses (1) plus the included corrected witnesses (1).

Below is the earliest attestation of each *individual Byzantine reading*:

Reading	Earliest attestation (century)

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 59 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (36) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IV.

Below is the earliest attestation of each *individual Byzantine reading*:

⁴⁹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁵⁰The total number of witnesses is calculated as the total manuscripts (112) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (11) minus the fragmentary witnesses (1) plus the included corrected witnesses (0).

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 80 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (20) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

⁵¹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁵²The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (5) minus the fragmentary witnesses (2) plus the included corrected witnesses (1).

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: V.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 87 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (20) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

⁵⁵These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁵⁶The total number of witnesses is calculated as the total manuscripts (112) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (13) minus the fragmentary witnesses (1) plus the included corrected witnesses (3).

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: X.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 64 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (37) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

⁵⁷These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁵⁸The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (11) minus the fragmentary witnesses (2) plus the included corrected witnesses (0).

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 65 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (35) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

⁵⁹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁶⁰The total number of witnesses is calculated as the total manuscripts (114) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (6) minus the fragmentary witnesses (2) plus the included corrected witnesses (0).

Reading	Earliest attestation (century)
οι	IV
μεν	IV
ουν	IV
απολυθεντες	IV
ηλθον	VI
εις	IV
αντιοχειαν	IV
και	IV
συναγαγοντες	IV
το	IV
πληθος	IV
επεδωκαν	IV
την	IV
επιστολην	IV

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts

are identical for the entire verse. There are 90 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (16) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IV.

Below is the earliest attestation of each *individual Byzantine reading*:

⁶¹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁶²The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (5) minus the fragmentary witnesses (0) plus the included corrected witnesses (1).

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 99 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (10) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine textform for this verse in a transcribed manuscript: VI.

Below is the earliest attestation of each *individual Byzantine reading*:

⁶⁵These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁶⁶The total number of witnesses is calculated as the total manuscripts (112) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (5) minus the fragmentary witnesses (o) plus the included corrected witnesses (o).

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 90 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The

remaining witnesses (17) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

⁶⁹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁷⁰The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (10) minus the fragmentary witnesses (1) plus the included corrected witnesses (0).

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IV.

Below is the earliest attestation of each *individual Byzantine reading*:

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 80 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (22) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

⁷¹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁷²The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (11) minus the fragmentary witnesses (0) plus the included corrected witnesses (2).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 53 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (51) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): IV.

⁷³These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁷⁴The total number of witnesses is calculated as the total manuscripts (113) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (8) minus the fragmentary witnesses (1) plus the included corrected witnesses (0).

- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine textform for this verse in a transcribed manuscript: X.

Below is the earliest attestation of each *individual Byzantine reading*:

Reading	Earliest attestation (century)
βαρναβας	IV
δε	IV
εβουλευσατο	IX
συμπαλαβειν	IX
τον	IX
ιωαννην	IV
τον	IV
καλουμενον	IV
μαρκον	IV

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 68 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (36) attest to singular texts for the entire verse and are

therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

⁷⁵These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁷⁶The total number of witnesses is calculated as the total manuscripts (114) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (12) minus the fragmentary witnesses (3) plus the included corrected witnesses (0).

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 74 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (25) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: X.

Below is the earliest attestation of each *individual Byzantine reading*:

⁷⁷These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁷⁸The total number of witnesses is calculated as the total manuscripts (114) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (16) minus the fragmentary witnesses (1) plus the included corrected witnesses (0).

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 65 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (32) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Nomina sacra or abbreviations

Please note that one or more of the witnesses contains *nomina sacra* which have been spelled out by our automated algorithm. This process is very accurate, but occasional mistakes can happen, especially with obscure or uncommon *nomina sacra*. In case of doubt about the actual reading of a *nomen sacrum*, please consult the original transcripts or facsimiles.

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.

⁷⁹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁸⁰The total number of witnesses is calculated as the total manuscripts (114) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (9) minus the fragmentary witnesses (2) plus the included corrected witnesses (2).

- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine textform for this verse in a transcribed manuscript: IX.

Below is the earliest attestation of each *individual Byzantine reading*:

Reading	Earliest attestation (century)
παυλος	III
δε	III
επιλεξαμενος	IV
σιλαν	IV
εξηλθεν	IV
παραδοθεις	III
τη	IV
χαριτι	III
του	III
θεου	III
υπο	IV
των	IV
αδελφων	IV

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 85 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (20) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).

Earliest attestation

Note: Most manuscripts have not been transcribed yet. In consequence, the below information is based only on the limited sample available at the moment of creating the apparatus.

- Earliest attestation (century) of the *existence* of this verse (including fragmentary manuscripts): III.
- Earliest attestation (century) of the *complete, verbatim text* of the Byzantine texform for this verse in a transcribed manuscript: IV.

Below is the earliest attestation of each *individual Byzantine reading*:

⁸¹These corrected witnesses offer singular readings for the entire verse, which may indicate that our automated algorithm reconstructed them incorrectly. We are ignoring them from the collation in order to reduce the risk of displaying inaccurate results (the *uncorrected* witness may itself be included in the apparatus).

⁸²The total number of witnesses is calculated as the total manuscripts (114) minus the witnesses that attest to the verse more than once and where the verse could not be reconstructed (3) minus the fragmentary witnesses (1) plus the included corrected witnesses (1).

Reading	Earliest attestation (century)
διηρχετο	IV

Witness groups

The below groups show witnesses that share identical texts for the entire verse. That is, any two witnesses belong in the same group if their texts are identical for the entire verse. There are 93 witnesses in groups for this verse. For these, the apparatus lists the group instead of the individual witnesses. The group names are assigned automatically and their composition may change as new manuscripts are added to the collation in future. The remaining witnesses (18) attest to singular texts for the entire verse and are therefore not part of any group. These non-aligned witnesses are individually shown in the apparatus. Manuscript identifiers are shown preceded by the century of their estimated date (latest estimated date).
